

Sales Automation Application - Screens Description

1. Customer Management

The screenshot shows the 'Customer List' screen in the 'Sales Automation' application. The interface has a dark blue header with the title 'Sales Automation' and a 'Save Now' button. Below the header, there are three tabs: 'Step 1 - Customers' (active), 'Step 2 - Gmail Setup', and 'Step 3 - Send Emails'. The main content area is titled 'Customer List (0 customers)' and includes a sub-header 'Type each customer's email in the Email column — it saves automatically.' Below this is a table with columns: '#', 'Company Name', 'Service', 'Contact Person Name', and 'Email Address'. The table contains six rows of customer data. Each row has a red 'X' icon in the 'Email Address' column, indicating an error. At the bottom of the table, there is a '+ Add New Customer' button and a form with fields for 'Company Name', 'Service', 'Contact Name', and 'Email', followed by an 'Add & Save' button.

#	Company Name	Service	Contact Person Name	Email Address
1	Santosh Chemical	ISO 9001	Mr. Ajay Patel	mshichina9616@gmail.com X
2	Pantosh Engineering	ISO 14001	Mr. Chirag Prajapati	mshichina9616@gmail.com X
3	Sintrex Fertilisers	ISO 9001	Mr. Pritesh Shah	mshichina9616@gmail.com X
4	Ajay Precision Works	ISO 20001	Mr. Jay Chauhan	mshichina9616@gmail.com X
5	Mega Mail Services	ISO 45001	Mr. Dhiren Shah	mshichina9616@gmail.com X
6	6 sense	ISO 65456	Mrs. trupti	truptimkt7@gmail.com X

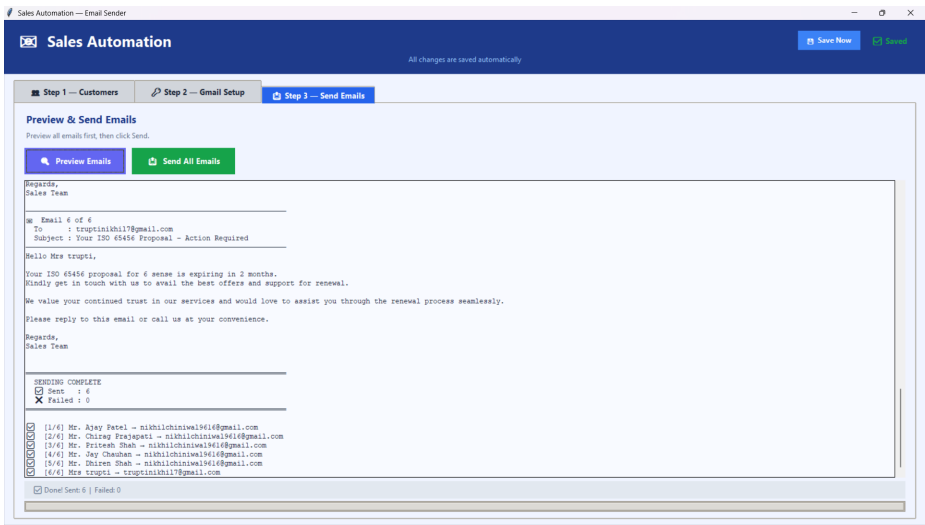

This screen displays the customer database used for email automation. Users can add, edit, or remove customer details, including company name, service type, contact person, and email address. All information is automatically saved for future email campaigns.

2. Gmail Configuration

The screenshot shows the 'Gmail Configuration' screen in the 'Sales Automation' application. The interface has a dark blue header with the title 'Sales Automation' and a 'Save Now' button. Below the header, there are three tabs: 'Step 1 - Customers', 'Step 2 - Gmail Setup' (active), and 'Step 3 - Send Emails'. The main content area is titled 'Gmail Configuration' and includes a sub-header 'Your credentials are saved locally and loaded automatically next time.' Below this are three input fields: 'Sender Name' (with a dropdown menu), 'Gmail Address' (with the value 'mshichina9616@gmail.com'), and 'App Password' (with a masked password '*****'). Below the input fields, there is a note: 'Credentials are saved locally on your PC only (sales_data.json)'. At the bottom, there is a blue box with instructions on how to get an App Password (one-time setup): 1. Go to myaccount.google.com — Security — 2-Step Verification — Turn ON. 2. Go to myaccount.google.com/apppasswords. 3. Type SalesAutomation — Click Create — Copy the 16-character password. 4. Paste it in the App Password field above — it will be saved automatically.

This section is used to configure email credentials. Users enter the sender name, Gmail address, and Gmail App Password. Credentials are stored locally and loaded automatically, enabling secure authentication and seamless email delivery through Gmail services.

3. Preview and Send Emails

This screen allows users to preview generated emails before dispatch. After verification, emails can be sent individually or in bulk. The system displays delivery status, success and failure counts, recipient details, and overall email campaign progress.
